6.1 INTRODUCTION

The External Dosimetry program at the Pacific Northwest National Laboratory (PNNL) is the same program that existed at Hanford subsequent to 01/03/1965 when Battelle Memorial Institute (BMI) assumed responsibility for operation of the Hanford Laboratories and certain Hanford-wide services and functions as part of the Atomic Energy Commission (AEC) operations at the Hanford site. Since that is the case, it has been determined that any dose reconstructions that incorporate the dose received by PNNL employees as a result of external exposure to radiation will be determined based on the programs described in the corresponding Hanford TBD (ORAUT (Oak Ridge Associated Universities Team), 2004, Technical Basis Document *for the Hanford Site – Occupational External Dosimetry*, ORAUT-TKBS-00006-6, Oak Ridge, Tennessee).
